PRODUCT NAME: M & I INSTALLMENT LOAN SYSTEM 3.3 (018729)

Software Alliance Corp
 2150 Shattuck Ave 11th Flr
 Berkeley, CA 94704
 (415) 548-7752

CONTACT: Monsler Prod. Mktg. Mgr., Barbara B.

M & I Installment Loan system Version 3.3 provides a multi-bank, multi-branch consumer loan system. It is an on-line, realtime, menu-driven system that processes revolving credit, dealer accounting/floor plan, student loans and more. Flexibility in multiple earnings/rebate reserve accounting, and fixed or variable pricing is provided. Problem loan management features include delinquency, renegotiated, non-accrual and charge-off processing and reporting. The package also includes insurance accounting. Parameter-driven reporting/customer bill and notice options allow for flexibility in tailoring for the user's needs. The system can be part of the integrated banking system. *MD ROM

PRODUCT NAME: Route Accounting & Manufacturing System--RAMS 86.0 (@04331)

Dimension Data Inc
212 Peters Rd #208
Knoxville, TN 37923
(615) 690-3008

CONTACT: Johnson, Randy

Route Accounting & Manufacturing System--RAMS 86.0 has a multi-company, multi-location structure supporting up to 99 branches per location each having 9 warehouses. It is designed to analyze and control the manufacturing cost of finished and intermediate products. It is an integrated system operating on a common set of files with extensive pre-order capability, price discounting, promotion, rebate, and commission flexibility. Route-based distribution activity is reconciled daily, as is all inventory activity. Comprehensive sales and profitability reporting and a full set of audit trails are provided. The system controls fleet management, accounts payable, general ledger, and payroll. The primary modules include: (1) pre-order, including history based orders; (2) accounts receivable with bill cycle and open item flexibility; (3) sales analysis with customer/product profitability; (4) route settlement; (5) fleet management; (6) warehouse inventory; and (7) manufacturing costing. The package is designed for formula oriented processors. 256K RAM; 80MB disk storage on System/36 required

PRODUCT NAME: Association Friendly Membership Processing--AFMEP (002119)

Kennerly Associates Inc
6302 Merna Lane
Lanham, MD 20706
(301) 441-1390

BEST AVAILABLE COPY

CONTACT: Kennerly Pres., Raymond Grady

Association Friendly Membership Processing--AFMEP was designed, developed, documented, and implemented to be operated by membership personnel. AFMEP is updated on a formatted screen and has the following capabilities/features: menu driven; daily cash reports (trial balance, certification, and final); identification cards; renewal notices; address label selection and generation; membership listings, unrenewed membership listing; supports divisions and chapters; deferred income report; rebate report; statistical reports (membership and transaction); transaction list; ad hoc reporting; and query. Different types of membership are supported and rates are stored in a table to facilitate changes, two different rates can be stored and utilized based on effective date. The update program validates all input as it is entered and provides 'HELP'. A normal renewal only requires the operator to enter the member number and the amount paid. Although flexible, the AFMEP system has controls built in to prevent problems; e.g., the user cannot begin processing transactions for a new date until the previous cash has been balanced. AFMEP also provides additional security with passwords which allow some users to only query the data base and others to update or request reports.

PRODUCT NAMES: OS/2 Standard Edition (900174)

TITLE: Users Say OS/2 Needs More Than Rebates

DeMarzo, Camille Doyle, T.C.
Computer Reseller News, v314- p2(2) May 8, 1989
REVIEW TYPE: Product Analysis
GRADE: Product Analysis, No Rating

Despite IBM's rebate incentives, many believe it will take far more drastic action to generate OS/2 system sales. Its costly memory requirements, as well as the lack of available software, have far more impact on potential purchasers than the initial price of the system. Others cited system

rebate would entice a small group of purchasers who would channel the savings into additional memory management devices.

PRODUCT NAMES: Ami Windows (901931)

TITLE: Samna's Ami Offers Value as an Executive WP Program

Lombardi, John

Computer & Software News, v7 n13 p23(2) Mar 27, 1989

REVIEW TYPE: Product Analysis

GRADE: Product Analysis, No Rating

Ami Windows is a PC-based word processing software package that runs with Microsoft Windows. It is totally WYSIWYG. Its word processing environment provides on-screen formatting information. Ami Windows is slow in the graphics mode but picks up in its draft mode. Layout and editing are slow. Full mouse support is provided. Ami is very easy to use, its technical support is good, and Samna offers a \$100 rebate on an upgrade to Ami Professional. Ami Windows requires a fast machine with a hard disk running Microsoft Windows.

Computers in Banking, v5 n7 p54(1) Jul 1988

REVIEW TYPE: Product Analysis

GRADE: Product Analysis, No Rating

First released in 1984, this system is a relative newcomer to the market and has recently been upgraded to include revolving credit and FASB 91 functions. A mainframe system developed by a service bureau, it integrates the processing of commercial, consumer and mortgage loans. It can also handle loans that do not fit into any of these categories. Other features include floorplan processing, rebate reserve accounting and special attention to loans that use accounts receivable as collateral.
